Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: During the phone interview Mr. McNulty was asked to provide support in the specification for conduits being placed within the pharynx above the epiglottis and at a distance from the epiglottis as recited in claim 1 under points c-e. Mr. McNulty directed Examiner Ali to page 7 lines 20-22 of the disclosure where it recites, "the conduit may terminate at various position within the channel", and figures 2A, and 2D further support that in a fully deployed state the conduits are being placed within the pharynx above the epiglottis and at a distance from the epiglottis.

Following items were discussed with Mr. McNulty to place the application in condition for allowance: (1) Mr. McNulty suggested changes to abstract by examiner's amendment. Changes only involves deleting words to comply with abstract having the range of 50 to 150 words, and (2) Mr. McNulty agreed to incorporated the language of "wherein in a fully deployed state" the distal end is disposed within the pharynx above the epiglottis and at a distance from the epiglottis to over come the combination of teaching of Moses US'665 and Christopher US'610A1. Mr. McNulty further agreed to other changes made to claims in the examiner's amendment.
